aremaC Is The Most Comprehensive Camera & Photo Editing App For iPhone

If you've been following me anywhere – AddictiveTips included – you may have guessed that I am a huge fan of photography apps for the iPhone. It's not only because of my interest in photography, but also owing to the fact that the capable cameras on iPhone 4 and iPhone 4S get really complemented by all the good apps out there in the iTunes App Store. AddictiveTips' archives are full of brilliant photo apps, including the likes of [Magic Hour](#) and [IncrediBooth](#), disposable camera replicas like [Dotti](#), and Mosaic & Collage makers like [Fotoyaki](#). Then there are feature rich photo editors like [Pho.to Lab](#) and [Luminance](#), which let you tweak about any aspect of your photos, and capable camera replacement apps such as [King Camera](#) and [TapShot](#), which can change the entire scope of how you handle your iPhone's already-pretty-decent camera. What's more, this is merely the tip of the iceberg, as the App Store is teeming with several other alternatives, many of which might be even better.

[Hands-On With Google \[Review\]](#)
If you're among those running Android 4.0 Ice Cream Sandwich, you'll be happy to know that Google has released a new version of the operating system, Android 4.1 Jelly Bean. This update brings with it a host of new features, including a new home screen, a new notification system, and a new search interface. It's a significant update, and one that's well worth checking out.

[Dashlane Is Your Personal Alternative To LastPass](#)
When it comes to selecting a password manager, there are a lot of options out there. LastPass is one of the most popular, but there are several alternatives that offer different features and benefits. Dashlane is one of these alternatives, and it's a solid choice for anyone looking for a secure and easy-to-use password manager.

[\[Giveaway\] Tilt-Shift G Shift Effect On Images](#)
Tilt-Shift photography is a technique that creates a shallow depth of field, making the background appear out of focus. This effect is often used to create a sense of scale and perspective in landscape photography. It's a fun and creative way to capture your surroundings, and it's a technique that's well worth learning.
